SECTION 01

Executive Summary

Voltage ($VLTG) is the utility token of EUC Dojo. EUC Dojo is based in Central Florida. It teaches people to ride electric unicycles (EUCs), rents wheels, runs Dojo events, and builds PEV Dojo, a rider app for every kind of personal electric vehicle (PEV): EUCs, ebikes, scooters, electric skateboards and one wheel boards. $VLTG is how riders in the app are rewarded.

Riders earn $VLTG by winning: Legends season prizes in PEV Dojo, and prizes at EUC Dojo and partner events later. Riders spend $VLTG first in the $VLTG Shop inside PEV Dojo, with more uses planned, such as discounts on lessons and rentals, VIP events and partner shops.

$VLTG was deployed on Base on 24 June 2026 with a fixed supply of 10,000,000,000 tokens. The contract has no owner, cannot mint or burn, and has no transfer tax, freezing or transfer limits. $VLTG cannot be bought or sold yet. A launch pool on Aerodrome is targeted for Q1 2027, and the locked allocations move into on chain unlock contracts before trading opens.

METRIC	DETAIL
Token name	Voltage
Ticker	$VLTG
Total supply	10,000,000,000, fixed. No minting, no burning
Blockchain	Base, an Ethereum Layer 2 built by Coinbase
Token type	Utility token (ERC-20)
Contract	0xa1aeaad8b22ad3068582e38f776770850b4d9e7f
Treasury	Safe multisig 0x251F48Ca002617ee051374E57631702F44979E93
Deployed	24 June 2026 on Base
Liquidity	Not yet live. Aerodrome launch pool targeted for Q1 2027
Who can use it	Adults 18 and over

SECTION 02

About EUC Dojo

EUC Dojo is a riding community that started with electric unicycles in Central Florida, with one goal: give more people a safe way into the sport, and give riders a reason to keep riding together.

In 2026 its rider app opened to every kind of PEV and was renamed PEV Dojo. EUCs, ebikes, scooters, electric skateboards and one wheel boards now ride together in one app. EUC Dojo's lessons, rentals and its own Dojo events stay focused on EUCs.

What runs today

- **Training.** Learn to Ride sessions: one on one coaching with the wheel and safety gear provided. Paid by card.
- **Rentals.** Wheels rented 10am to 10am, with a signed rental agreement, a waiver and a deposit hold. Paid by card.
- **Rides.** Two kinds. Dojo events are run by EUC Dojo and led by Dojo Hosts, who check riders in with the app. Group rides are posted by riders, are open to every PEV, and the rider hosting scans people in with the app. EUC Dojo does not have a permanent venue yet.
- **Shop.** EUC Dojo apparel and rider gear, made to order, card checkout.
- **PEV Dojo, the rider app.** Where riders of every PEV compete, connect, book and use $VLTG. See section 04.

SECTION 03

How $VLTG Works

Earn

Legends seasons. Legends is the competition inside PEV Dojo. It has a board for each kind of PEV: EUC, Ebike, Scooter, Skateboard and One Wheel. Every rider is on all five boards at once. When riders join a group ride or start a trail, they say which PEV they are riding, and that ride counts on that board. Each board crowns its own winners every season: riders who clear the season's Quest, a Belt Champion for each belt, and a Crew Legend, the crew with the most Chi on that board. Riding with the Dojo, earning titles and belts, and building Chi (the app's rider score) are how riders climb. The current season is a beta season with no prizes. After launch, winners receive $VLTG at the end of each season. Prize amounts are set before each season and announced in the app. Prizes are paid in $VLTG at its trading price when they are sent, and they come from the Community allocation.

EUC Dojo events (planned). Prizes in $VLTG at events EUC Dojo runs. Details will be announced before launch.

Partner events (planned). EUC Dojo plans to work with partner companies that run racing and riding events, where winners can earn $VLTG. No partnerships are in place yet.

Spend

The $VLTG Shop. The first place to spend $VLTG. It sits inside PEV Dojo and sells digital profile items, such as auras, photo frames, name styles and six chat sticker packs starring Jin and Dumper. Physical items EUC Dojo has in stock are planned. The shop is built and opens when the launch pool is live.

Lessons and rentals (planned). $VLTG will be usable for discounts on EUC Dojo lessons and rentals, which are for EUCs. Details will be announced before launch.

VIP access (planned). $VLTG will be usable for access to VIP events. Details will be announced before launch.

Partner shops (planned). Partner companies may accept $VLTG for their products or services. No partnerships are in place yet.

Your wallet

- **Wallets.** Riders 18 and over can connect a Base wallet in the app, or create a Passkey wallet: a Coinbase smart wallet that opens with the passkey saved on their phone.
- **Token Terms.** Adults agree to the $VLTG Token Terms when they create their account. Riders who joined earlier agree once before they make a wallet. The terms are at eucdojo.com/token-terms.html.
- **Buying (planned).** Once the pool is live, adults will be able to buy $VLTG in the app with Apple Pay or a card, through Coinbase.

Riders under 18

$VLTG features are for adults 18 and over. Riders under 18 can use the rest of the app, with a parent's approval, and can compete in Legends. A rider under 18 who wins receives a prize of the same value as merch or a gift card, not $VLTG.

SECTION 04

The PEV Dojo App

PEV Dojo is EUC Dojo's rider app, for riders of every PEV. It is a web app that riders add to their phone's home screen. It is not in the App Store or Google Play. It is in beta with early riders and opening to the public.

PART OF THE APP	WHAT IT DOES
Legends	Season competitions with a board for each PEV, leaderboards, and Legends crowned on every board
Belts and titles	Titles unlock by riding. Each rider has a belt for each PEV, from White to Black, and moves up by earning titles
Chi	The rider score, earned by riding: Dojo events, group rides, titles and trails other riders finish. Each PEV has its own season Chi. It decides VS matches
Crews	Rider crews with their own crew chat
Feed and follows	Riders follow each other and see their posts in the Feed
Messages	Direct messages and group chats
Rides and check in	Book Dojo events or join group rides other riders post, on any PEV. Hosts check riders in by scanning My Pass
Trails	Riders make and follow trails with checkpoints, and rate the ones they ride
Notifications	A notification center and push alerts, with a switch for each kind
Rent a Wheel and Shop	Book rentals and buy merch inside the app, paid by card
Family accounts	The app is for riders 13 and up. Parents approve riders 13 to 17
Wallet and $VLTG Shop	For adults: connect a wallet, see a $VLTG balance, spend in the $VLTG Shop

SECTION 05

Token Architecture

Blockchain: Base

$VLTG is on Base, the Ethereum Layer 2 network built by Coinbase (chain ID 8453). Transactions usually cost less than a cent, which makes small rewards practical.

The contract

$VLTG is a plain ERC-20 token. The whole supply was created once, at deployment, and sent to the treasury Safe. The source code is published and verified on Basescan.

PROPERTY	VALUE
Name / symbol / decimals	Voltage / VLTG / 18
Total supply	10,000,000,000, created once at deployment
Minting	None. No function exists to create more
Burning	None. No burn function
Owner or admin	None. Nobody can change the contract
Pause, freeze, blacklist	None
Transfer tax or limits	None
Upgradeable	No

Security review

The contract was checked with automated analysis tools before deployment. No third party audit has been done and none is planned before launch. The contract is deliberately minimal: a standard ERC-20 with nothing an owner can change after deployment. Readers should weigh that for themselves.

Custody

Every allocation is held in a Safe multisig wallet (0x251F48Ca002617ee051374E57631702F44979E93). No single person can move tokens. Every transaction needs approvals from several hardware wallets, and more signers will be added over time.

Unlock contracts

Before trading opens, the Founder, Team & Ops, Early Adopter and Liquidity allocations move from the treasury into on chain unlock contracts. Every unlock clock starts the day the launch pool opens, and tokens release once a month. Nobody, including the founder, can speed an unlock up. The unlock contract addresses will be published on eucdojo.com when they are deployed.

Liquidity

At launch, $VLTG trades on Aerodrome, the main exchange on Base. 1,000,000,000 tokens seed the launch pool, and the pool tokens are locked for 18 months. Another 1,000,000,000 are held in reserve, locked for 18 months. The launch date is a target, not a promise, and it may move.

SECTION 06

Tokenomics

The supply is fixed at 10,000,000,000 tokens and nothing is ever minted or burned.

ALLOCATION	%	TOKENS	PURPOSE	UNLOCK
Community	33%	3,300,000,000	Legends prizes and other community rewards	Not locked. Held in the treasury Safe and paid out over time as rewards
Liquidity	20%	2,000,000,000	Aerodrome launch pool and a reserve	1B launch pool and 1B reserve, each locked 18 months
Founder	15%	1,500,000,000	Founder compensation and long term alignment	Monthly over 36 months
Team & Ops	12%	1,200,000,000	Team, contractors and operations	Monthly over 12 months
Early Adopters	20%	2,000,000,000	Bought before launch under the Early Adopter Purchase Agreement (EAPA)	10% at launch, then 90% monthly over 12 months

When unlocks start

Every unlock clock starts the day the launch pool opens. Tokens release once a month. Until the pool opens, the whole supply sits in the treasury Safe, and nothing trades.

Circulating supply starts small: the 10% early adopter release, the tokens in the launch pool, and Community rewards as they are paid out. It grows month by month as the unlocks run.

SECTION 07

Roadmap

Phases 1 to 3 are done. Dates on later phases are targets and may move.

PHASE	WHEN	MILESTONES
1 · Foundation	Complete April 2026	Website, litepaper and whitepaper published, social accounts, community building
2 · Token	Complete 24 June 2026	$VLTG deployed to Base, source verified on Basescan, early adopter allocations recorded under the EAPA
3 · Platform	Complete June to Nov 2026	Rider app with Legends, belts, titles, Chi, crews and crew chat, Feed and follows, group rides, trails, notifications, wallet connection, family accounts and Dojo Host check in. $VLTG Shop built. Online booking, rentals and waivers. The app opened to every PEV and was renamed PEV Dojo, with a Legends board and a belt for each PEV
4 · Launch	Targeted Q1 2027	Unlock contracts deployed and loaded. Aerodrome launch pool. $VLTG Shop opens. Buying in the app with Apple Pay or card. Legends prizes paid in $VLTG
5 · Partners	Targeted 2027	Partner racing and riding events with $VLTG prizes, and partner shops that accept $VLTG

SECTION 08

Team & Governance

Founder

EUC Dojo and $VLTG were founded by James Tate, a former mechanical and aerospace engineer who spent most of his career around high performance cars and motorcycles. He got into electric bikes, found EUCs, and started EUC Dojo. The website, shop, PEV Dojo app, booking and waiver systems were all built in house.

The founder allocation of 15% unlocks monthly over 36 months, starting the day the launch pool opens, through an on chain unlock contract anyone can check.

Team

The Team & Ops allocation of 12% covers contributors in development, design, marketing and community, and the cost of running EUC Dojo. It unlocks monthly over 12 months from the launch date.

Governance

EUC Dojo is founder led. There is no token voting. Holding $VLTG does not give anyone a say in how EUC Dojo is run, and there are no plans to add voting.

SECTION 09

Risk Factors

Holding or using $VLTG involves real risk. This list is not complete.

Market risk

Once it trades, the price of $VLTG may swing widely and may fall to zero.

Liquidity risk

There may be little liquidity at launch. Holders may not be able to sell, or only at a much lower price.

Regulatory risk

Crypto rules are changing in many countries. New laws could limit how $VLTG can be held, used or traded.

Smart contract risk

The contract has not had a third party audit. Even a simple contract can contain mistakes.

Custody risk

The treasury depends on hardware wallets held by people. Lost or compromised keys could delay or prevent transactions.

Adoption risk

$VLTG only has a use if riders use PEV Dojo, the $VLTG Shop and, once they exist, VIP events. That is not guaranteed.

Ride reporting risk

Riders tell the app which PEV they rode. The app cannot check this, so results on each Legends board depend on riders being honest.

Schedule risk

The launch date and planned features may slip or change.

SECTION 10

Legal Disclaimer

This whitepaper has been prepared by EUC Dojo for information only. It is not financial, investment, trading or any other kind of advice. Nothing in it is an offer, solicitation or recommendation to buy or sell any security, financial product or instrument.

$VLTG is a utility token for use inside the EUC Dojo ecosystem, including the PEV Dojo app. It is not a security, an equity stake, a debt, or an ownership interest in EUC Dojo or any related entity. Holding $VLTG gives no right to profits, dividends, returns or a vote. EUC Dojo makes no promise about the value of $VLTG.

$VLTG features in the PEV Dojo app are for adults 18 and over, and are covered by the $VLTG Token Terms at eucdojo.com/token-terms.html.

Using $VLTG involves significant risk, including total loss. Do not acquire $VLTG unless you are prepared to lose the entire amount. Do your own research and talk to qualified advisors before making any financial decision.

This whitepaper contains forward looking statements about EUC Dojo and $VLTG. They reflect current plans and could turn out differently. EUC Dojo is not obliged to update them.

This document is not directed at anyone in a place where its distribution or use would break local law. Readers are responsible for following the laws where they live.
